**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. The application has been amended as follows:
  - a. Claims 1, 11, and 14: The examiner simply notes that these claims have been amended by applicant to remove the comma from the phrase "first flange, and a second flange". As the deletion was only one character brackets should have been used rather than a strikethrough. This notation is simply to ensure that the removal of these commas is not overlooked.

***Allowable Subject Matter***

3. Claims 1-12 and 14-20 are allowed.

***Reasons for Allowance***

4. The following is an examiner's statement of reasons for allowance:
5. Carver, Caldwell, and/or Campbell disclose the majority of the independent claim limitations as set forth in the previous action, including a top plate disposed within, and in direct contact with, a top track. While Carver discloses a top plate with only two flanges (Fig. 25), he does not disclose that the flanges extend only downward

from the web. Carver does not disclose a top or bottom plate meeting both these limitations while residing in and directly contacting a top or bottom track.

6. Many prior art references teach a top or bottom plate disposed within a top or bottom track and having only two downward flanges: Howell – Fig. 3 (3,996,712), Lizee (3,481,090), and Boyle, Jr. – Fig. 4 (3,411,252), to name a few. However, all these references fail to teach that the webs and one leg of the track and plate are in direct contact with one another. Instead, these and other prior art references teach that the plate is centered within the track to accommodate panels on either side.
7. It would not be obvious to modify any of these references by shifting the plate to one side so that a plate leg and web were both in direct contact with the complimentary track members, since there is no motivation in the prior art and it is not well-known to do so. Any modifications to these references that would arrive at the invention would require improper hindsight.
8. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
